## HOW DRIVEWYZE™ PRECLEAR WORKS

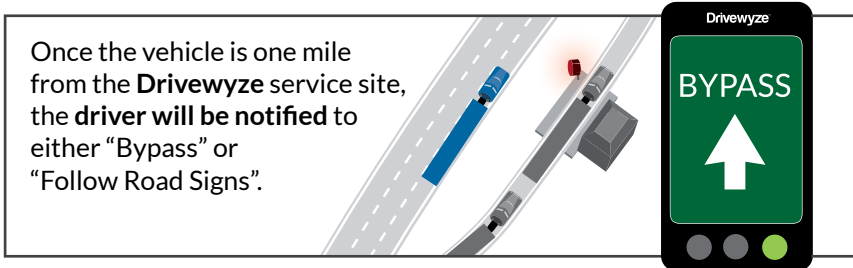

Once a vehicle is registered for **Drivewyze™ PreClear**, the driver downloads the app and signs in before starting a trip. The tablet or smartphone can be placed in a dash mount for **safe and hands-free operation**.

When the vehicle is two miles from a Drivewyze service site, the Drivewyze app will display a **visual and audible alert**.

Once the vehicle is one mile from the Drivewyze service site, the driver will be notified to either "Bypass" or "Follow Road Signs".

Bypass rates are determined based on carrier safety score and credentials. All communications with **Drivewyze PreClear** are protected with 128-bit encryption technology to ensure user privacy.
